Specification for body bags

Swartland hospital hereby invites suppliers to quote on the supply and delivery of body bags.

General Description:

Heavy-duty body bags (Infint, Juvenile, Adult) designed for safety, hygienic and respectful handling and transportation of deceased individuals in hospital response settings.

BODY BAGS:

- Standard colour(No other colour is acceptable).
- Single use, without handles.
- Manufactured from low density polyethylene.
- Vern material, suitable to be written on with permanent marker (case number ect.)
- Bags shall be cut into one piece of material in a rectangular shape.
- Material shall be folded over the length with overlap not less than 100mm wide(included).
- One side of the opening shall have double-side tape or strip approximately 70mm wide, to ensure containment of body fluids when sealed. Width ends of bag shall be heat sealed. Packed in clear packets of 10.
- This is for the Infint, Juvenile and Adult size.
- The thickness must be 150 mic.

Quantity:100 of each size (Infint, Juvenile, adult).
