PLEASE EACH LOT MUST HAVE OWN QOUTATION IT IS

SectionV. Schedule of Requirements

Contents

1. Technical Specifications

Technical Specifications

- The purpose of the Technical Specifications (TS) is to define the technical characteristics of the Goods and Related Services required by the Purchaser. The Purchaser shall prepare the detailed TS take into account that:

- The TS constitute the benchmarks against which the Purchaser will verify the technical responsiveness of bids and subsequently evaluate the bids. Therefore, well-defined TS will facilitate preparation of responsive bids by bidders, as well as examination, evaluation, and comparison of the bids by the Purchaser;

- The TS shall require that all goods and materials to be incorporated in the goods be new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided for otherwise in the contract;

- The TS shall make use of best practices. Samples of specifications from successful similar procurements in Namibia or sector may provide a sound basis for drafting the TS;

- the Purchaser encourages the use of metric units;

- Standardizing technical specifications may be advantageous, depending on the complexity of the goods and the repetitiveness of the type of procurement. Technical Specifications should be broad enough to avoid restrictions on workmanship, materials, and equipment commonly used in manufacturing similar kinds of goods;

- Standards for equipment, materials, and workmanship specified in the Bidding Documents shall not be restrictive. Recognized international standards should be specified as much as possible. Reference to brand names, catalogue numbers, or other details that limit any materials or items to a specific manufacturer should be avoided as far as possible. Where unavoidable, such item description should always be followed by the words "or substantially equivalent." When other particular standards or codes ***of*** practice are referred to in the TS, whether from Namibia or from other eligible countries,

a statement should follow other authoritative standards that ensure at least a substantially equal quality, then the standards mentioned in the TS will also be acceptable;

- reference to brand names and catalogue numbers should be avoided as far as possible; where unavoidable, the words "or at least equivalent" shall always follow such references;

- *Technical Specifications shall be fully descriptive of the requirements in respect of, but not limited to, the following:*

  2. (a) standards of materials and workmanship required for the production and manufacturing of the Goods;

  3. (b) detailed tests required (type and number);.

  4. (c) other additional work and/or related services required to achieve full delivery/completion;

  5. (d) detailed activities to be performed by the Supplier, and participation of the Purchaser thereon;

  6. (e) list of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied in the event that such guarantees are not met, and

- *The TS shall specify all essential technical and performance characteristics and requirements, including guaranteed or acceptable maximum or minimum values, as appropriate. Whenever necessary, the Purchaser shall include an additional ad-hoc bidding form (to be an Attachment to the Bid Submission Sheet) where the Bidder shall provide detailed information on such technical performance characteristics in respect to the corresponding acceptable or guaranteed values.*

7. *When the Purchaser requests that the Bidder provides in its bid a part of or all the Technical Specifications, technical schedules, or other technical information, the Purchaser shall specify in detail the nature and extent of the required information and the manner in which it has to be presented by the Bidder in its bid.*

8. *[If a summary of the Technical Specifications (TS) has to be provided, the Purchaser shall insert information in the table below. The Bidder shall prepare a similar table to justify compliance with the requirements]*

9. *Summary of Technical Specifications.*

10. *The Goods and Related Services shall comply with following Technical Specifications and Standards:*
