Posey Wraps Soft Velcro Wraps

The Posey pulse oximeter probe wrap helps secure many styles of flexible optical transducers and probe sensors, without using adhesive tape, to prevent the misalignment of optical components while blocking out excessive ambient light.

- Holds optical components firmly to help prevent misalignment
- Universal design - The oximeter probe wrap fits a neonatal foot, an infant toe, or a pediatric or adult finger.
- Flexible sizing - Oximeter probe wrap measures 5" long x 1" wide (13cm x 3cm) and may be cut to fit any length required.
- Soft material - The tapeless pulse oximeter wrap is made of soft foam and does not stick to skin, allowing easy application and removal as well as helping to preserve delicate skin.
